

Anywhere

Francesco Binfaré

General description:

Anywhere is the first sofa with a movable structure that, while also varying the seat depth, allows you to freely shape the backrests using the Smart Cushion. With simple movements, the sofa changes configuration smoothly and naturally. The elements of Anywhere are seven. Each has an irregular shaped base with sides that can be joined together, or they can be used as single elements.

Use:

Whether enjoyed in company or alone, it opens up to endless comfort scenarios, anywhere.

Anywhere backrests swivel on pivots positioned at the ends of the base: simply guide the movement with your hands to change the seat depth.

Anywhere's Smart Cushion is integrated into the mobile structure so that a simple gesture shapes the tilt of the backrest in a natural fluid way.

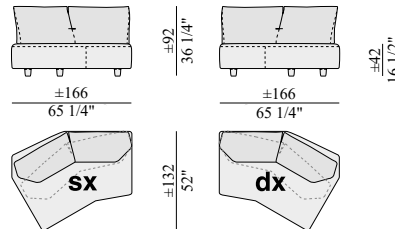

This Edra-patented technology guarantees maximum comfort in every situation.

Technical description:

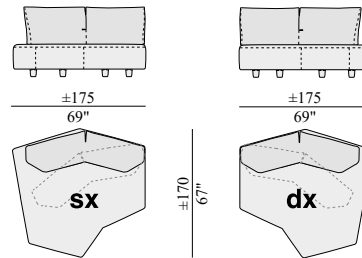

Steel frame with painted wooden legs.
Padding in polyurethane and Gellyfoam®.
Upholstery is technically removable.
